

Created with the needs of today's families in mind

MADAWASKA

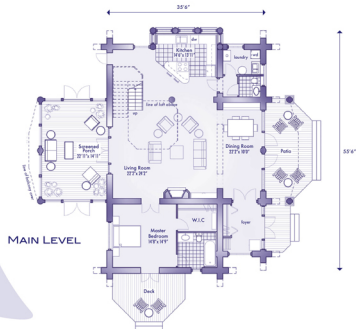

Our goal is to provide you with a log home that suits your exact needs and lifestyle. Perfect for young families, the Madawaska is a unique home that downplays some of the larger and more dramatic features of other log homes in favour of a design more suited for active, functional living.

Created with the needs of today's families in mind, the Madawaska features four bedrooms, a generous loft, a huge screened porch off the living room, a large deck on the second floor, and a shared balcony between two of the upper bedrooms. In short, there's plenty of room to work, play, or just sit back and enjoy your surroundings.

One of our smaller log homes, the Madawaska is extremely cozy, comfortable, and intimate. But thanks to the open concept floor plan, featuring a central living room with all of the other rooms branching out from it, this home feels just as spacious and luxurious as any other.
