

*A perfect choice for a second home
or seasonal getaway*

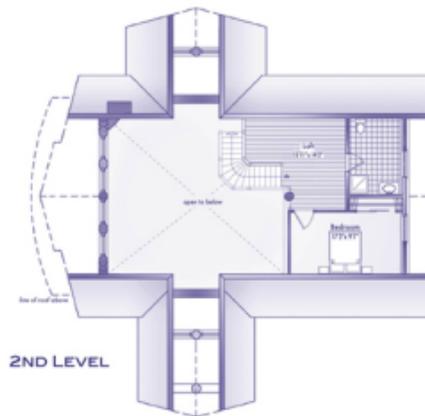

KOOTENAY

A perfect choice for a second home or a seasonal getaway, the Kootenay is great for young families who don't necessarily need a lot of space, but still want all of the luxuries that a log home has to offer.

Among the many features found in the Kootenay is a large open concept kitchen (with an island that seats four) that seamlessly connects to both the dining room and living room. In addition, a large loft overlooking the Great Room provides plenty of room for your guests, while a covered entry porch, large curved deck, corner stone fireplace, and soaring rooflines all add to the inviting atmosphere of this cottage-style home.

Like many of our log homes, the Kootenay also contains an option for a walkout basement (as illustrated to the right) – if you decide that you need a little more room to live and play, the option is always on the table.
